

Short Summary Of Changes

- Missing values were handled by removing rows with important missing data and filling unknown country values.
- Duplicate records were identified and removed.
- Text values were standardized for consistency (e.g., country names formatted properly).
- Date format was converted to dd-mm-yyyy for uniformity.
- Column headers were cleaned (converted to lowercase and spaces replaced with underscores).
- Data types were checked and corrected (e.g., numeric and date fields formatted properly).
